

# Board Closes Schools Again

Another outbreak of influenza has caused the health authorities to close all schools in the township. During the past week a number of new cases have developed and although the situation is not alarming, it was thought best to take all measures possible to prevent the spread of the disease.

The local board of health has ordered all members of families wherein the disease is prevalent to remain at home unless it was necessary for them to be away from home. The churches and moving picture show were closed and all public meetings are prohibited.
